Annual subject index

Acetate,
synthesis, role of carbon monoxide dehydrogenase, *Acetobacterium woodii* 147
***Acetobacterium woodii*,**
role of carbon monoxide dehydrogenase, acetate synthesis 147
Adenosylcobalamin,
dependent chemical rearrangements 21
S-Adenosylmethionine,
dependent enzyme activation 123
Amino acid,
pyrroloquinoline quinone, adduct formation 251
Angiotension-converting enzyme,
zinc, lung cancer 177
Aproliferin,
characteristics, function 129
***Azotobacter*,**
vanadium-containing nitrogenase 111

Bacterial biosynthesis,
PQQ intermediates 297
Baker's yeast,
pyridoxal reductase properties 187
Biotinidase,
activity, effect of biotinyl-peptides 179
Biotinyl-peptides,
effect of, biotinidase activity 179
Blood,
CoQ_{10} analysis 157

Carbon monoxide dehydrogenase,
role of, acetate synthesis, *Acetobacterium woodii* 147
Carboxylase,
vitamin K, trifluoromethyl analogues synthesis, substrate 255
***Clostridium purinolyticum*,**
selenium dependent glycine reductase properties 293
***Clostridium sticklandii*,**
selenium dependent glycine reductase properties 293
Coenzyme A,
carb(dethia)- derivatives, use, enzymic mechanisms 267
Coenzyme Q_{10},
analysis, blood 157
blood levels, significance, human 67
levels, human blood, effects of allergies 303

DNA,
synthesis, effects of epidermal growth factor, human foetal kidneys culture 313

Epidermal growth factor,
effects of, DNA synthesis, human foetal kidneys culture 313
Eukaryotes,
enzymes, a new cofactor, pyrroloquinoline quinone 41
Eukaryotic cells,
ubiquitin, characteristics 133
Eukaryotic ribosomes,
tRNA enzymatic binding, inhibitory effect of oligodeoxynucleotides 193

Fatty acylation,
membranes, association 219
Ferritin,
iron storage protein 207
Flavones,
nodulation induction, legumes 3
Folate,
metabolism, mitochondria 171

Glutathione peroxidase,
selenium dependent, gene mapping, human chromosomes 285
Glycine reductase,
selenium dependent, properties, *Clostridium sticklandii*, *Clostridium purinolyticum* 293
Glycogenin,
serine phosphate, possible regulatory site 261

Human blood,
coenzyme Q_{10} levels, effects of allergies 303
Human chromosomes,
gene mapping, selenium dependent glutathione peroxidase 285
Human foetal kidneys,
culture, DNA synthesis, effects of epidermal growth factor 313
Hydrogenase,
review 279

Inositol phosphates,
metabolism, functions 117
Interferons,
biochemistry 227
Iron,
storage, ferritin 207
Iron-molybdenum cofactor,
nitrogenase, biosynthesis 199
Isoflavones,
nodulation induction, legumes 3

Legumes,
nodulation induction, flavones/isoflavones 3
Liver,
trimethylamine oxidation, *not* molybdenum dependent 153
Liver microsomes,
vitamin K-dependent carboxylase substrate, menaquinone-2 derivatives 61
Lung,
cancer, zinc, angiotension-converting enzyme 177

Membranes,
protein fatty acylation, association 219
Menaquinone-2,
derivatives, substrate, vitamin K-dependent carboxylase, liver microsomes 61
Methanogen factor 390,
formation, characteristics 237
Methanogenic bacteria,
occurrence/metabolic role of methanopterin 95
with low concentrations methanopterin, 7-methylpterin derivatives 105
Methanopterin,
methanogenic bacteria with low concentrations, 7-methylpterin derivatives 105
occurrence/metabolic role of, methanogenic bacteria 95
Methylotrophs,
excretion, pyrroloquinoline quinone 51
7-Methylpterin,
derivatives, methanogenic bacteria with low concentrations methanopterin 105
Microorganisms,
growth stimulation, pyrroloquinoline quinone 51
Mitochondria,
folate metabolism 171
Molybdenum,
trimethylamine oxidation, no connection, liver 153
Molybdopterin,
derivatives, characteristics, make-up 273

NADP,
derivation, phospho adenylylation/phospho ADP-ribosylation 37
Nickel,
micronutrient, plants 11
Nitrogenase,
iron-molybdenum cofactor biosynthesis 199
vanadium-containing, *Azotobacter* 111

Oligodeoxynucleotides,
inhibitory effect of, enzymatic binding, tRNA, eukaryotic ribosomes 193
Oncogenes,
interactions, similarities, steroid hormones receptors 71

Phospho adenylylation,
NADP derivation 37
Phospho ADP-ribosylation,
NADP derivation 37
Plants,
nickel, micronutrient 11
Platelet-derived growth factor,
functions, characteristics 213
PQQ,
intermediates, bacterial biosynthesis 297
Protein,
factors, ribosome extracts 161
fatty acylation, membranes, association 219
glutamyl residues, vitamin K-dependent carboxylation 55
Protein kinase C,
family, heterogeneity/differentiality 17
Pyridoxal reductase,
properties, baker's yeast 187
Pyrroloquinoline quinone,
a new cofactor, enzymes, eukaryotes 41
amino acid, adduct formation 251
methylotrophs excretion, microorganisms growth stimulation 51

Queuine,
biosynthesis, function, occurrence, tRNA 27
oxidative metabolism 241

Rat,
vitamin B_6 measurement 307
Ribosome,
extracts, protein factors 161
Ribosome extract,
growth promoting, mouse cells 167
tRNA,
enzymatic binding, inhibitory effect of oligodeoxynucleotides, eukaryotic ribosomes 193
queuine biosynthesis/function/occurrence 27

Selenium,
dependent glutathione peroxidase, gene mapping, human chromosomes 285
dependent glycine reductase, properties, *Clostridium sticklandii*, *Clostridium purinolyticum* 293
Selenocysteine,
UGA directed co-translation, involvement 245
Serine phosphate,
possible regulatory site, glycogenin 261
Steroid hormones receptors,
interactions, similarities, oncogenes 71

TGF-beta,
new chemical forms/biological roles 89
Thiols, ovo-,
role of, fertilization 85
Trimethylamine,
oxidation, *not* molybdenum dependent, liver 153

Ubiquitin,
eukaryotic cells, characteristics 133
UGA,
directed co-translation, selenocysteine, involvement 245

Vanadium,
-containing, nitrogenase, *Azotobacter* 111
Vitamin B_6,
measurement, rat 307
Vitamin K,
dependent carboxylase substrate, menaquinone-2 derivatives, liver microsomes 61
dependent carboxylation, glutamyl residues, proteins 55
trifluoromethyl analogues, synthesis carboxylase substrate 255

Zinc,
angiotension-converting enzyme, lung cancer 177
biochemistry, physiology, toxicology, clinical pathology 31
